

Intermediate Rifle Skills

This 1-day course provides a quick overview of the Basic Rifle Course before getting into more advanced rifle shooting and handling tactics. Intermediate rifle focuses on getting the rifle on target more rapidly, while effectively placing shots, successive shooting, engaging multiple attackers, getting ourselves off the "X", shooting moving and shooting, as well as shooting while moving. We will discuss theories such as Boyd's O.O.D.A. Loop to assist in understanding how and why we do things, and how the behavioral sciences affect our reactionary and decision-making processes.

Intermediate Rifle is 100% on range with a vast majority of the 8 hours focused on live-fire training, allowing students to apply what they've learned in a controlled, professionally maintained environment. This course is quick paced and provides the knowledge and confidence needed for responsible rifle handling and usage.

PREREQUISITE: Students must have attended GIOTEX Solutions Basic Rifle or another company's basic rifle course that is deemed to be comparable by the GIOTEX Solutions administration. Proof of course graduation must be presented.

Necessary Equipment:

- Semi-Automatic AR Platform Rifle
- Single-point, 2-point, or 3-point rifle sling
